Customer Linkage Contact Data Extract

A new 'Customer Linkage Contact Data Extract' had been created. This report will need to be added via EQUIP Menu Maintenance.

Users can create a report and save the data as a .CSV file to upload to the Customer Linkage Tool. The report will only include Contact records that do not have been previously linked to Registry (do not have a prior Customer Entity ID (CKC ID)).

- ❖ NOTE: The columns in the exported CSV file must remain in the same order as generated in the report. The Customer Linkage Tool is expecting the data in this order to successfully run.

Selection Criteria:

- Searching by "Name" will search Contact names that begin with the criteria specified for Company, Doing Business As, or Last Name.
- **Top xxxx Customers Based on Sales** filter to return Contacts based on sales.
  - ❖ Note: If you wish to link your "Business with Contact" contacts directly to Business in Registry then check the "Exclude Business Contact Name for Businesses with Contacts?" checkbox. This will remove the contact's name (Prefix, First Name, Familiar Name, Middle Name, Middle Name, Last Name, Generation, Suffix) in the results returned.
